Letter of Recommendation

Our company has worked with Wasta Bin Jackers for the last several years as a subcontractor for building our grain bins. We have been very impressed with their performance and would highly recommend their services to anyone.

The main difference between Wasta and other bin subcontractors is they do what they, provide honest and realistic scheduling, and provide a completely finished product. They are a very efficient crew that can handle any size bin we sell.

I never have to worry about their crew representing our company in a negative way. From Evan to all of his employees they are all very respectful, polite, and professional throughout the project.

I am confident you will be happy having Wasta work on any of your grain bin projects. Please feel free to contact further about my experiences with them.

Sincerely,

**Brandon Jeseritz
